

Website Builder Handoff

Shayan Venture Ecosystem - Full Multi-Page Website Package

Prepared as a complete website handoff package with sitemap, page strategy, project pages, builder prompt, deployment notes, and launch checklist.

1. Website Goal

Build a full website, not a landing page. The site should organize Shayan's projects and businesses into a credible ecosystem with dedicated pages for each project, business, and opportunity.

2. Required Site Structure

- Home
- Projects
- Businesses
- Services
- About
- Contact
- Privacy Policy
- Terms of Use
- Dedicated page for each project/business

3. Project and Business Pages

Agent Command Center (ACC)

Category: AI Operating System

Status: Pre-production / integration hardening

Tagline: AI Operating System for Execution.

A modular AI operating system that routes goals across agents, tools, approvals, memory, automation, and connected workflows.

Features to include:

- Task Bus and agent routing
- Telegram and dashboard operation
- Approval gates for risky actions
- Provider fallback: low-cost AI first, premium when needed
- Memory, snapshots, results, and audit trails
- Connector/plugin architecture

Alphonso Ecosystem

Category: Local-first AI Ecosystem

Status: Desktop ecosystem / operator-grade build track

Tagline: A living AI ecosystem for serious operators.

A cinematic local-first AI ecosystem where specialized agents collaborate inside a premium desktop command environment.

Features to include:

- Local-first desktop shell
- Jose, Alphonso, Miya, Maria, Marcus agent roles
- Approval Center and proof receipts
- Memory confidence system
- Creative studio and workflow dashboards
- Installer, updater, and shareable deployment vision

SessionGuard

Category: Behavior Analytics Platform

Status: Product build / V10.1 wiring milestone

Tagline: Turn every session into intelligence.

A session intelligence platform that helps users track, analyze, and improve decision-making patterns through data, reports, and risk insights.

Features to include:

- CSV upload and session processing
- Live capture and WebSocket updates
- Comparison reports and trend analysis
- Risk scoring and behavior tags
- PDF exports and visual reports
- Desktop proof track planned

TapCash

Category: Rewards Platform

Status: Concept / business planning

Tagline: Simple rewards. Smarter growth.

A GPT-style rewards and offerwall platform concept focused on lean launch, attribution, anti-fraud, and scalable reward operations.

Features to include:

- Offerwall integration roadmap
- Firebase/Vercel lean stack concept
- Anti-fraud and attribution planning
- Reward ledger and user account flows
- Content and growth workflow support
- Admin dashboard concept

Obsidian Media

Category: Media & Content Strategy

Status: Business concept / launch package

Tagline: Content systems for brands that want momentum.

A media and content strategy brand for social campaigns, storytelling systems, YouTube/Instagram workflows, and AI-assisted content operations.

Features to include:

- Content strategy and calendars
- Short-form and long-form workflow design
- Brand storytelling packages
- AI-assisted script and creative planning
- Repurposing systems
- Launch campaign support

Obsidian Studios

Category: Creative Production Studio

Status: Business concept / studio services

Tagline: Premium creative systems for modern brands.

A creative studio brand for visuals, trailers, faceless channels, AI cinematics, brand kits, and campaign assets.

Features to include:

- AI cinematic visuals
- Teaser and trailer concepts
- Brand kit production
- Social assets and campaign packs
- Faceless YouTube visual systems
- Creative workflow automation

Blazely

Category: Marketing Automation Venture

Status: Concept / workflow design

Tagline: Launch faster. Capture leads. Grow smarter.

A commission-based marketing and landing-page system for lead generation, business growth, and automated campaign workflows.

Features to include:

- Landing page creation
- Lead capture workflows
- CRM/lead table setup
- Campaign automation

- Performance reporting
- Upsells for SEO/copy/maintenance

Founder Project

Category: AI Company-in-a-Box

Status: Strategic concept / productization track

Tagline: From idea to operating company system.

A systemized AI company-in-a-box concept that helps founders move from idea to offer, operations, content, automations, and launch assets.

Features to include:

- Idea validation workflows
- Business model templates
- Brand and offer creation
- Website and launch asset generation
- Operating workflows
- Agent-based execution plans

Cullinan Construction

Category: Construction Services

Status: Operating / service business

Tagline: Construction execution with clarity and control.

A general contracting and construction services brand for renovations, new builds, landscaping, project management, and high-quality execution in Ontario.

Features to include:

- Residential renovations
- Custom home support
- Landscaping and interlock
- Concrete and exterior work
- Project coordination
- Quote and consultation funnel

AI Tourist Assistant Platform

Category: Travel / Event Opportunity

Status: Opportunity concept

Tagline: A smarter local guide for major-event visitors.

A tourist assistant concept for major events such as the FIFA World Cup in Canada, helping visitors navigate local services, food, transport, events, and emergency information.

Features to include:

- Multilingual visitor assistant

- City guides and itineraries
- Local business listings
- Event and transit help
- Emergency and safety info
- Sponsor/affiliate placement opportunities

UniUni DSP Opportunity

Category: Logistics Business Opportunity

Status: Research / evaluation

Tagline: Evaluate the logistics opportunity before you commit.

A delivery service partner opportunity page for evaluating startup requirements, capital needs, operating model, vehicles, hiring, insurance, and profitability.

Features to include:

- Requirements checklist
- Startup cost model
- Fleet and staffing plan
- Insurance/compliance checklist
- Competitor opportunity comparison
- Decision scorecard

4. Design Direction

- Premium dark cinematic interface
- Professional AI venture studio feel
- Clean project cards and strong CTAs
- Responsive mobile-first layout
- Use real screenshots/demos once available
- Avoid fake metrics or unsupported claims

5. Builder Instructions

A builder can use the static website as a visual and content starter, or rebuild the same structure in Webflow, Framer, WordPress, Next.js, Lovable, Cursor, or another website system.

6. Launch Checklist

- ☐ Replace placeholder email and phone
- ☐ Connect contact form backend
- ☐ Add analytics and conversion tracking
- ☐ Add favicon and social preview image
- ☐ Review privacy policy and terms
- ☐ Add screenshots, demos, case studies, and testimonials

[] Test all pages on desktop and mobile

[] Connect domain and SSL

7. Copy-Paste Builder Prompt

Copy-Paste Prompt for a Website Builder / Developer / AI Builder

You are building a complete multi-page website for Shayan Venture Ecosystem. This must not be a single landing page. Build a professional, premium, responsive website where every project and business has its own dedicated page.

Brand direction: premium dark cinematic AI venture studio; professional, trustworthy, execution-focused; not childish, not generic, not cluttered.

Main site pages required:

1. Home
2. Projects
3. Businesses
4. Services
5. About
6. Contact
7. Privacy Policy
8. Terms of Use

Project/business pages required:

- Agent Command Center (ACC)
- Alphonso Ecosystem
- SessionGuard
- TapCash
- Obsidian Media
- Obsidian Studios
- Blazely
- Founder Project
- Cullinan Construction
- AI Tourist Assistant Platform
- UniUni DSP Opportunity

Every project page must include:

- Hero section with name, category, status, tagline, and summary
- Audience section
- Problem section
- Solution section
- Core features section
- Suggested CTA section
- Build notes / next-step sidebar
- Contact or waitlist CTA

Home page must explain the whole ecosystem clearly and route visitors into AI systems, product ventures, service brands, and opportunities.

Projects page must list all projects with filtering by category.

Businesses page must show the service/revenue brands and operating opportunities.

Services page must convert the ecosystem into clear offers: AI workflow design, website/MVP planning, marketing/content systems, AI visual production, operations systemization, and construction project support.

Contact page must include a working form or clear integration instructions. Connect it to one of: Formspree, Netlify Forms, Webflow Forms, HubSpot, Airtable, or a custom backend.

Technical requirements:

- Responsive layout
- Clean semantic HTML or modern React/Next.js components
- Strong SEO titles/descriptions
- Fast loading
- Accessible colors and buttons
- Clear navigation
- Footer with major links
- Placeholder legal pages marked for lawyer review
- Easy content editing later

Use the attached website starter and builder docs as the source of truth. Improve the design and structure where useful, but do not remove any project pages.
